2015 Annual Report Highlights Progress on the Council Bluffs Interstate System Improvement Program

(Council Bluffs, IA – February 9, 2016) – The Council Bluffs Interstate System Improvement Program released its 2015 Annual Report today that highlights progress made on construction and design projects over the last year. The annual report features information about completed and active projects, public outreach, program status, statistics for work completed in 2015, and 2016 key projects.

“The Program was very busy over the last year working towards opening capacity to reduce congestion on I-80/I-29 west of South Expressway and completing several improvements near the I-29 and U.S. 275/Iowa 92 Interchange,” said Iowa DOT District 4 Engineer Troy Jerman. “The Program’s Annual Report provides a high-level overview of all of the work and design engineering that occurred in 2015 to provide the public with a summary of how Iowa DOT is delivering this important highway improvement project.”

To view the annual report, visit <http://councilbluffsinterstate.iowadot.gov/2015annualreport/>. To request a hard copy of the report, or for general information regarding the program, contact the Council Bluffs Interstate System Improvement Program office.
